Subject: [External] Solar energy

Dominion's proposed increase in fees for those using solar power, and the proposed reduction of compensation for surplus solar energy, are simply horrifying. An energy provider in 2021 must absolutely support emphasis on renewable resources, and lead us away from dependence on fossil fuels. We are depending on you to protect the voters and energy users of the state of South Carolina, and to do all you can to reverse the effects of climate change on our planet.

Thank you.
